

## SPRINT WELDING SCREEN

### COMPOSITION

- For steel basic welding screen:
- Carbon steel tubes, profiles, powder coated or zinc plated.
- Contain no toxic parts.
- Contain no inflammable parts.
- Contain no electrical parts.

### USE AND HANDLING

Coating will be damaged by open fire or intensive heat. There is a possibility that the screen is unstable by rough, unequal floor conditions.  
Oil or grease pollution do not have negative effects on the screens condition.

### MAINTENANCE AND SAFETY

- Bolts must be periodic checked at free assembly.
- Beams are only applicable for use of curtains or sheets, not for heavy weight products which overload the beam.
- It is not recommended for hoisting operations

### FEATURES

Made from solid welded carbon steel tubes and profiles. Screen is free moveable in any direction.

Screen will be supplied in loose parts, packed in a solid box, and must be fixed with included metric fasteners by basic tools.

### DESIGN

Distance between floor level and upper beam is 194 cms, total width 198 cms.  
To obtain a stable construction, both foot profiles do have a length of 60 cms.

## SPRINT WELDING SCREEN

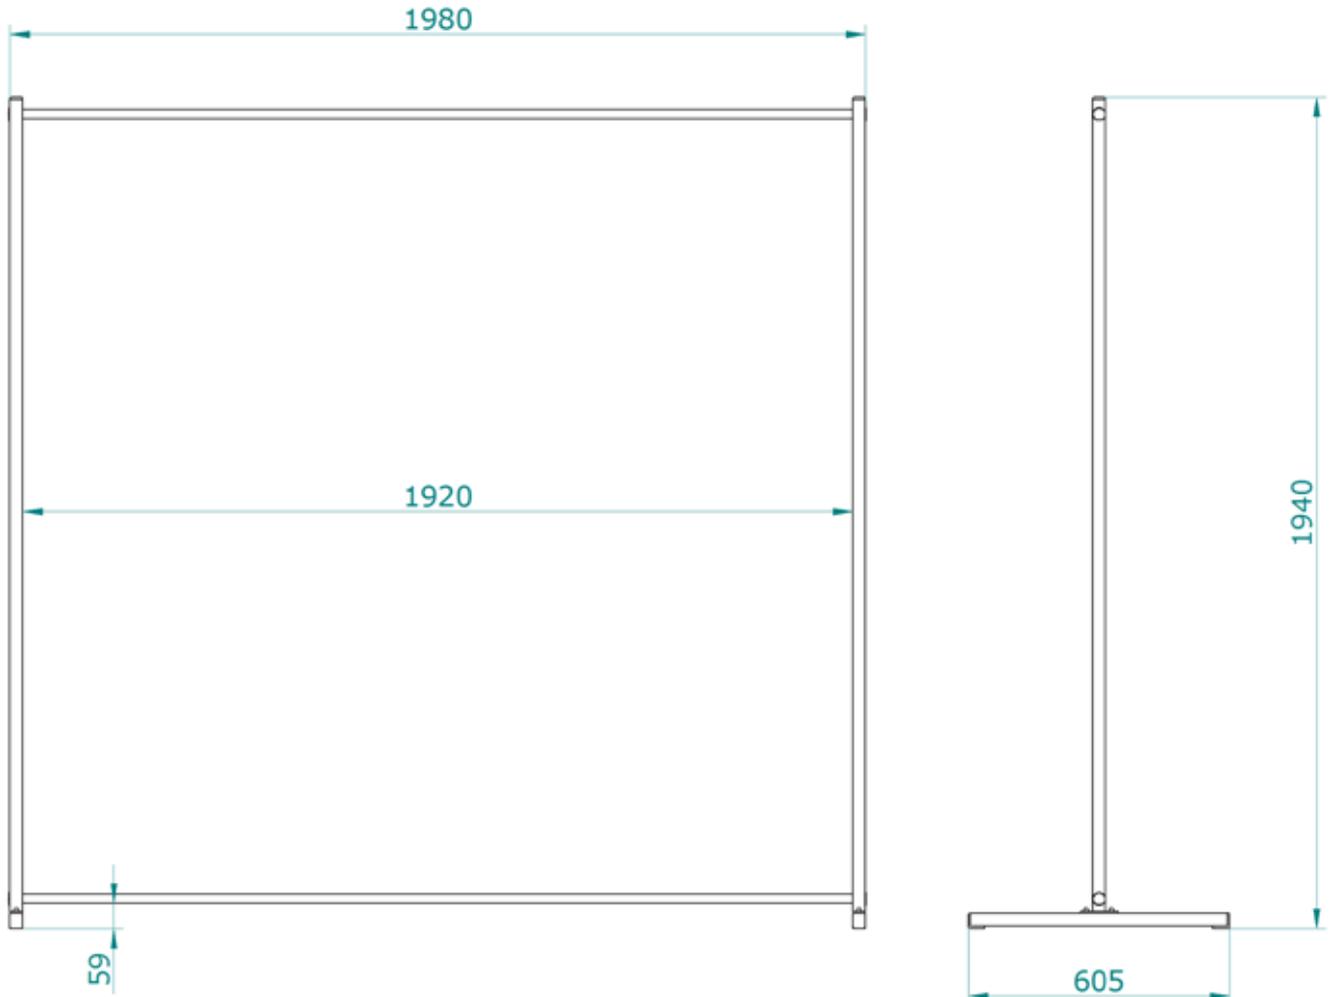

### TECHNICAL DATA

Type of welding screen	: solid, moveable screen
Total weight, basic screen	: 12 kgs.
Maximum static load beam	: 60 N
Maximum dynamic peak load beam	: 100 N
Range	: free moveable in any direction
Overall size height	: 1940 mm
Functional width	: 1980 mm
Fasteners	: Metric
Castor	: option
Operation	: by hand
Coating	: poles and foot profiles powder coated in red RAL3020
Materials	: steel tube and profiles
Application	: for internal use
